## Six and Eight Hour Packages Include Our Portrait Station at Your Reception.

**The Photo Portrait Station** is like a photo booth only better. Our Portrait Station is a very enjoyable activity for your guests as we create casual, fun, and tasteful portraits. Watch as they come out of their shells to make funny faces, smile, and have an amazing time laughing in front of the camera. We provide props and a fun time while creating beautiful portrait photographs.

We select a nice background at your reception site or provide a background and a professional photographer creates well composed, high-resolution photographs. Using studio lighting equipment, the photographer will be available to photograph your guests in any groupings they would like.

This is a wonderful opportunity for couples, families, and groups of friends to have a professional portrait taken. Our high-resolution prints are produced by a professional photo lab and will be posted online for three months and everyone is welcome to view the photos and to order prints.

**"I love to photograph people** and the warm emotional moments that naturally occur on your special day. This is one of the many joys of being a wedding photographer.

With artistry and sensitivity, my kind, calm disposition and diplomatic personality, I am able to capture the emotions and expressions of your wedding day without interrupting the natural flow of events.

My experience as an award winning photojournalist allows me to capture those special candid moments without being intrusive. With over 20 years experience as a professional photographer I have developed the skill and insight to create memorable works of art of your wedding day. " ~ Owen
